

Carbon Reduction Plan

Supplier name:Adcuris Consulting Ltd.....

Publication date:21st November 2023.....

Commitment to achieving Net Zero

Adcuris Consulting is committed to achieving Net Zero emissions by 2050.

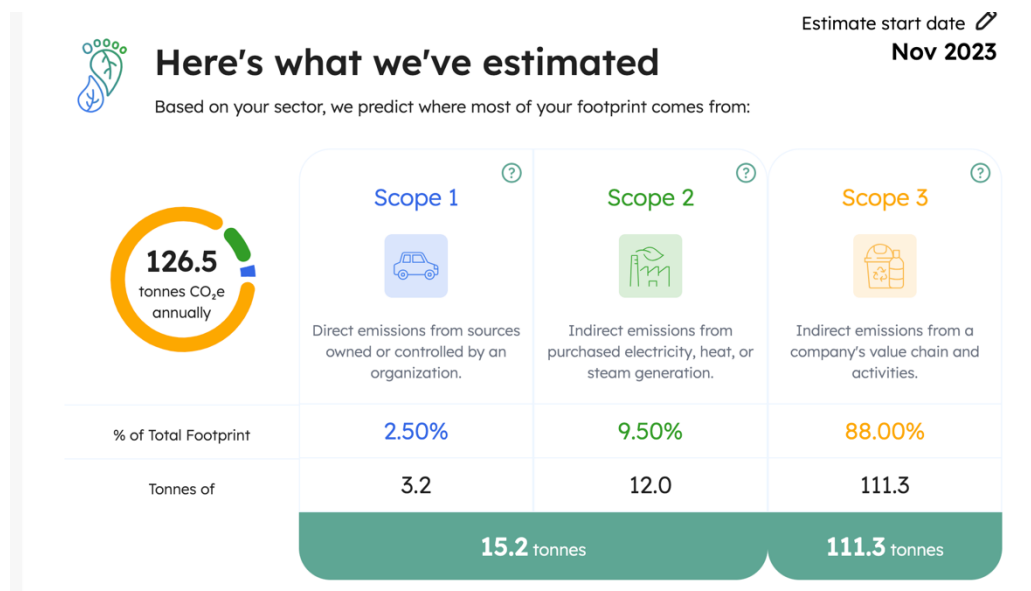

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023	
Additional Details relating to the Baseline Emissions calculations.	
We have no previous data and this is our first carbon reduction plan. The figures are based upon an estimate calculator from https://www.switch2zero.com/business/calculator	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	3.2
Scope 2	12
Scope 3 (Included Sources)	111.3
Total Emissions	126.5

Current Emissions Reporting

Reporting Year: 2023	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	3.2
Scope 2	12
Scope 3 (Included Sources)	111.3
Total Emissions	126.5

Emissions Reduction Targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 113.85 tCO_{2e} by 2035. This is a reduction of 10%.

Adcuris aims to achieve this by introducing additional measures where appropriate such as:

- Continuing to car share or use public transport/ greener transport methods wherever possible
- Switching to Hybrid or Fully Electric cars
- Continuing to undertake other office based initiatives such as:
 - Maximising natural light to reduce electricity/ lighting requirements
 - Replace old light bulbs and fluorescent tubes with LED lights
 - Reduce the air conditioning levels
 - Improve insulation
 - Reducing paper usage resulting in less energy consumption
 - Investing in green energy and green office equipment

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

This is our first carbon reduction plan and as such we have no baseline against which to measure our achievements. However, we have implemented the following changes to reduce our carbon footprint and to contribute to the sustainability agenda in accordance with our environment management policy and sustainability policy:

Travel and meetings:

- Walking, cycling and/or using public transport to attend meetings, site visits etc, apart from in exceptional circumstances where the alternatives are impractical and/or cost prohibitive
- Avoiding physically travelling to meetings etc where alternatives are available and practical, such as using teleconferencing, video conferencing or web cams, and efficient timing of meetings to avoid multiple trips. These options are also often more time efficient, while not sacrificing the benefits of regular contact with clients and partners
- Reducing the need for our associates to travel by supporting alternative working arrangements, including home working etc, and promote the use of public transport

Purchase of equipment and consumption of resources:

- Minimising our use of paper and other office consumables, for example by double-sided all paper used, and identifying opportunities to reduce waste
- As far as possible arranging for the reuse or recycling of office waste, including paper, computer supplies and redundant equipment

- Reducing the energy consumption of office equipment by purchasing energy efficient equipment and good housekeeping
- Purchasing electricity from a supplier committed to renewable energy. Seek to maximise the proportion from renewable energy sources, whilst also supporting investment in new renewable energy schemes
- Ensuring that timber furniture and any other timber products are recycled or from well-managed, sustainable sources
- Purchasing fair-trade and/or organic beverages

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
